(a)
$P(q \geq q_{\text{obs}})$
$q(0)$
Toys, $A_{\text{true}} = 0$ (293)
$\chi^2_1$ (Wilks)
(b)
$p$-value of $t(A_{\text{true}})$
Uniform quantile
Nominal ($n = 985$)
All injected values
(c)
Density
$t(A_{\text{true}}) = -2\ln[L(A_{\text{true}})/L(\hat{A})]$
Toys, nominal
$\chi^2_1$
