(a)
Bootstrap replicas
Standard normal
ProbK > 0.6: sd(shift) = 0.0051
median σ_B = 0.0050
Density
Shift of $\hat{A}$ / median σ_B
(b)
ProbPi < 0.4: sd(shift) = 0.0025
median σ_B = 0.0023
Density
Shift of $\hat{A}$ / median σ_B
