(a)
Replicated data
Observed ($p_B < 0.001$)
Replicates
χ^2 (10 MeV bins, both charges)
(b)
Replicated data
Observed ($p_B = 0.996$)
Counting asymmetry, fit window
(c)
Replicated data
Observed ($p_B = 0.734$)
Counting asymmetry, $|m - \mu| > 4\sigma$
